think about ceramic

PORCELANOSA is one of the main world references in bathroom design for its tile collections and bathroom accessories. PORCELANOSA tiles, manufactured with the highest quality standards, are synonymous with design and good taste. For this reason, they are increasingly used in all kinds of environments such as built-in shower trays.

BUTECH has a wide range of shower trays that can be covered directly with tiles from PORCELANOSA. In addition to the bathroom floor, tiles can also be used for the shower tray, allowing a wide variety of designs and assuring accessibility. Discover the different possibilities of shower areas that BUTECH offers to make your bathroom an unforgettable experience.

shower-deck

New concept of shower tray with hidden drain for the most exclusive bathrooms. This innovative shower tray system allows you to create a feeling of continuity with the rest of the flooring thanks to the fact that the slopes are hidden under the flooring. Drainage is achieved through the open joints and does not require the installation of an evacuation grate.

The **shower deck system** is a shower tray composed of a polyurethane base coated with thermoset polymers, ready to receive tiles without any type of adhesive. Especially recommended for bathroom renovations.

TECHNICAL INFORMATION

shower-deck

Main features

- Flat shower tray without slopes.
- Polyurethane coated with thermoset polymers.
- Hidden drain.
- Ultra-thin shower tray; only 30 mm high.
- Easy cleaning and high resistance to household detergents.
- Virtually zero maintenance, especially compared to wood deckings.
- Thermal insulator.
- Easy installation and assembly.

Recommended Applications

- Trays and shower cabins in all types of bathrooms.
- Shower trays for private and public use.
- Bathrooms adapted for people with reduced mobility.
- Disability friendly bathrooms.

shower-deck SHOWER TRAY COMPONENTS

Kit Imperband for renovation

Waterproofing system for shower trays consisting of an extra-thin drain, connected by a ring to a waterproof membrane. Especially recommended for waterproofing shower trays in renovation projects. This system is compatible with a wide range of steel grates, both square and linear; check the Butech professional catalogue.

kit imperband for renovation

TECHNICAL INFORMATION

Main features

Waterproof membrane:

- Thermoplastic polyolefin membrane coated on both sides by non-woven polyester fibres, suitable for type C2 cementitious adhesives, according to EN 12004.
- The fixing disk ensures a perfect connection to the drain, making the installation and the creation of slopes very easy. Maximum safety, eliminating risks of water leakage between the waterproof membrane and the drain.
- Size: 150 x 225 c

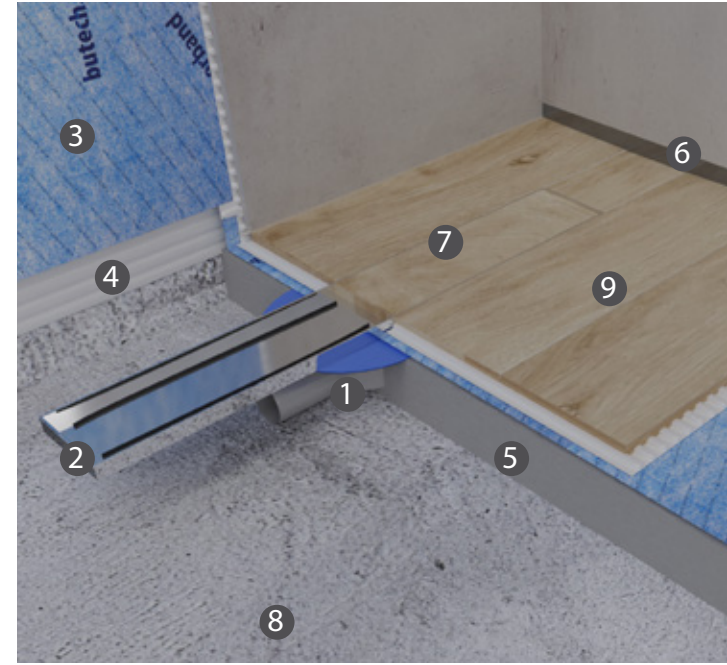

Kit Imperband for renovation:

- Compact drain of only 65 mm in height that allows installations of only 7.5 cm from the support to the tile.
- 50 mm diameter horizontal outlet.
- Drainage speed: 0.5 l / s
- Includes siphon piece.

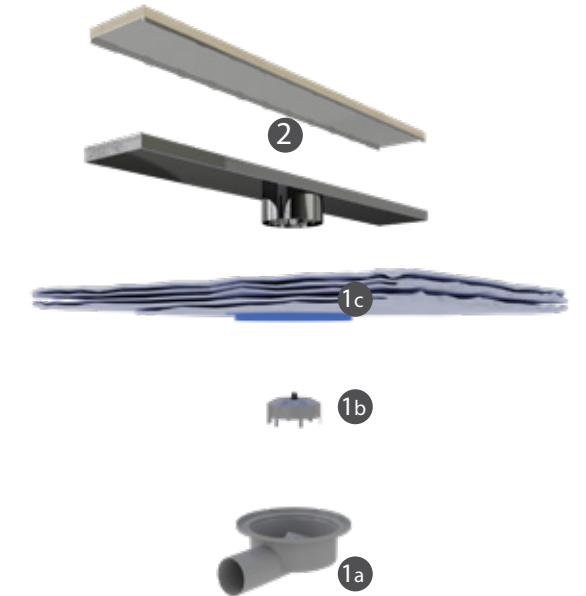

Recommended Applications

- Trays and shower cabins in all types of bathrooms.
- New construction projects and, especially, renovations.
- Residential use.

kit imperband for renovation SHOWER TRAY COMPONENTS

1. imperband kit renovation
2. ceramic grate with frame
3. imperband waterproof membrane
4. one-flex premium adhesive
5. screed
6. profile **pro-shower**
7. floor tiles for shower tray
8. substrate
9. epotech aqua grouting material

* The **imperband kit renovation** includes a drain (1a) with siphon (1b), with a waterproof sheet mounted on the fixing disc (1c).

* The grate (2) is ordered separately. Check available models and sizes.

* The **pro-shower** profile is sold separately. There are two **pro-shower** options (wall and floor)
