PORCELANOSA BATHS

# NER

by Fran Silvestre

From Krion PORCELANOSA Group comes NER, the new countertop and bathroom furniture collection designed by Fran Silvestre.

With Krion® Solid as the material of choice, thanks to its resilience, uniformity and its characteristic white, NER worktops stand out for their sharp and polyhedral shapes. Their straight lines reveal a sink with a fine opening that runs throughout, and through which the water is easily evacuated thanks to the inclination at its bottom. The technical part of the sink, such as the drain, which is ready to be joined directly to the siphon, is hidden from view, offering a clean and minimalist image.
