# KRION SHELL®

Krion Shell® is an Engineered Mineral Composite developed in-house by Krion. It consists of two parts: a structural inner core, made primarily of minerals (dolomite) with an eco-friendly resin binder, and a solid uniform outer surface made of mineral materials (ATH) and resins.

## 3/4 MINERALS

Most of the inner core of Krion Shell® is made of minerals (dolomite) found in abundance on the planet.

## 1/4 ECO-FRIENDLY RESINS

To bind the minerals, an eco-friendly resin is used, made of waste plastic. By using recycled PET plastics, waste materials are given a new life and a circular economy is promoted in the creation of Krion Shell®, minimizing the consumption of the planet's resources.

SCS Global Service, a leading North-American independent environmental certification agency, verifies and guarantees that all certified products made of Krion Shell® contain at least 5% recycled waste plastic in their composition, hence contributing to more sustainable, environmentally-friendly manufacturing processes.

**At least 5% waste plastic is used in its total composition**

### Material origin

75% of its composition is mineral.

### Sustainability

Not only does it contain a minimum of up to 5% recycled material; it is a resistant, durable product with a long life cycle.

### Resistance to impact

Krion Shell® is capable of incredible resistance to common impacts in a bathroom.

### Resistance to staining

Its zero-porosity makes it more resistant to stains, including those which have remained for a long time.

### Safe

Krion Shell® is tested under strict trials which certify that it is a safe product, free of dangerous components.

### Easy cleaning

Its easy cleaning allows time and the use of cleaning products to be reduced.

### Repairable

In the unlikely case of damage to the surface, it is possible to repair it using a special Kit.

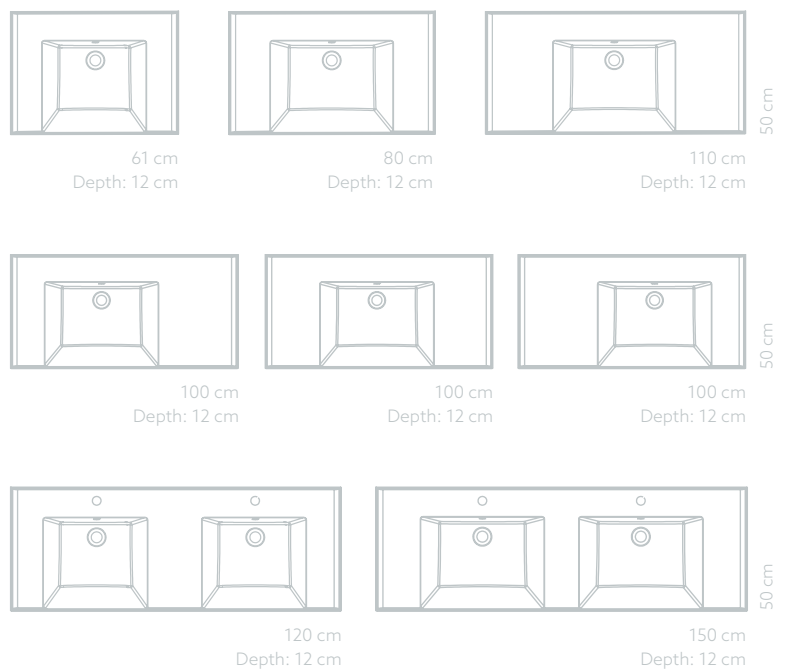

## WORKTOPS

The ONE countertops are amazing for their particular functionality, thanks to having a practically imperceptible perimeter edge which prevents splashing and facilitates daily hygiene. Two finishes: gloss and matte. The ONE collection makes an impact on the senses, the matte finish through touch due to its pleasant warmth, and the gloss finish through sight thanks to its shining appearance.

Overflow available in stainless steel and black.

The ONE washbasins, which follow the pattern of functionality of the collection, are available in several formats. The absence of corners makes the ROUND washbasin ideal for bathrooms where maximum safety is sought.

The square and rectangular models allow suspended installation, giving bathrooms a sensation of space and breaking away from monotony; or installation on units, the best option for bathrooms seeking the greatest convenience.

Overflow available in stainless steel and black.

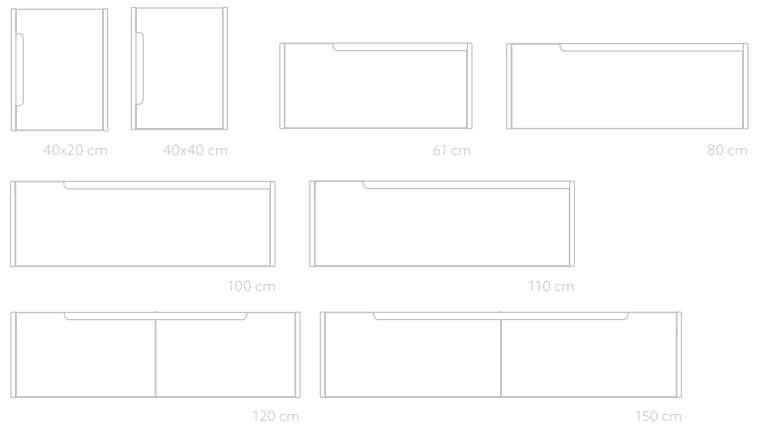

## WASHBASINS

## UNIT

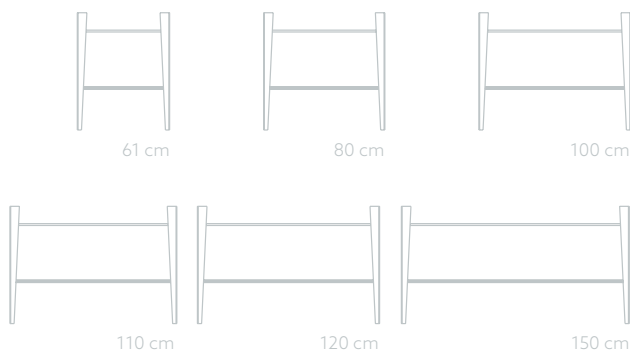

Following the minimalist style, we have designed the One unit in the Vulcano Grey colour. It is a modern, convenient unit notable for its large drawer with soft close and its long metallic handle.

VULCANO GREY

## METALLIC UNIT

The ONE chassis, made up of a structure and tempered glass shelf with a matte black finish, is notable for giving personality to bathrooms. With an avant-garde style, it brings order and balance to the most modern spaces.

# ACCESSORIES

The ONE collection is complemented by a series of accessories.

## TOWEL RAIL / SHELF

A towel rail designed for installation next to the mirror in black and stainless steel finish. Suitable for both positions.
