# MARKO

The Marko screen stands out for the simplicity of its lines. Composed of an anodized aluminum side profile, with a high gloss finish, it provides lightness, while reinforcing its design and structure with 6 mm transparent tempered glass. Marko brings warmth and spaciousness to the bathroom with its minimalist design, turning the space into an oasis of calm.

Thanks to the System Glass treatment applied on the internal side of the screen, it prevents the presence of limescale or soap marks, allowing easy cleaning. Its functionality is greater than in other shower screens due to its high technical features. Hinged and lifting, Marko allows openings of  $-90^{\circ}$ ,  $0^{\circ}$  and  $90^{\circ}$  and the extensible and orientable bracing arms allow a better adaptability.

## Gloss

Anodised aluminium profiling which achieves maximum performance in terms of safety, wear and corrosion resistance.

## Standards

ANSI Z97.1-2015 UA 16 CFR 1201 II  
EN 14428- 2016

Marko 1 · Gloss · Transparent Glass

Maximum security 6 mm tempered glass that complies with the EN-12150 standard. It also includes the System-Glass treatment as standard, which reduces the adhesion of dirt and limescale.
